

# OctoFrost

## OCTOFROST CONNECT

## ACCESS YOUR EQUIPMENT ANYWHERE

### GET THE BEST OUT OF YOUR EQUIPMENT

OctoFrost Connect is a powerful online platform that lets you access your OctoFrost equipment anytime, from anywhere. With real-time visualization of critical performance data, the app empowers you to monitor and maintain optimal efficiency.

The system operates through an Ethernet modem and can be accessed via a web portal or mobile app. Most OctoFrost units installed since 2021 come with a pre-installed modem. For earlier units, modem installation is typically possible.

### STAY UP TO DATE

- Ensure food safety with live temperature fluctuation monitoring.
- Prevent disruptions through continuous monitoring of freezer components.
- Achieve smooth operation and higher uptime with preventive maintenance.

## ENSURE FOOD SAFETY

- Detect and prevent potential refrigeration issues.
- Ensure food safety with real-time temperature monitoring.
- Track refrigerant temperatures for accurate issue detection.

## ACCESS LIVE & HISTORICAL DATA

- Get real-time temperature monitoring.
- Access historical data export for up to 7 years.
- Track temperature across different machine zones.

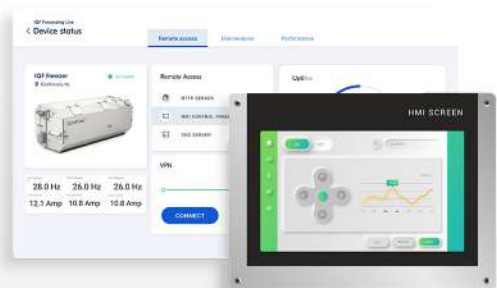

## OPTIMIZE UPTIME WITH INSIGHT

- Boost efficiency with real-time monitoring of fan speed and energy use.
- Maintain motor health through proactive performance tracking.

## EASY TO INSTALL AND USE

- Get the app and software license (*discounted with a 3-year subscription*).
- Install the Octofrost Connect Ethernet modem (*if not yet installed*).
- Enable access for multiple users through the web portal or mobile app.
